

Connecticut Valley School of Woodworking

Greetings:

Carving the Ball & Claw Foot leg requires a few specific carving tools. You can purchase them at the Woodcraft store in the front of the school if you like (the stock #'s are listed below). Make sure to tell the cashier you are buying them for the class so that you can get the 10% discount. You are also welcome to purchase them elsewhere. Whichever you do, I would recommend you get them in advance of the class so that you can finish sharpening them if they need it.

05D07- #5 - 20 mm

05A10- 8mm dble. bevel skew

05I10 - # 11- 10mm viener

05J09 - #25 - 10mm backbent.

You should also bring some basic tools with you if you have them (if not- the school has more than enough for you to use)

Basic Tools to bring:

Rasp – Nicholson # 49 or 50 is ideal

7/8" – 1/1/4 inch chisel- only if it has been sharpened!

Card scraper

Compass

Backsaw

Spokeshave

I look forward to seeing you here.
